# COCO PEAT GROW BAGS

Plants can be directly planted and grown in coco coir grow bags, simplifying the planting process and eliminating the need for separate containers. This saves time and labor while providing a convenient growing environment for the plants.

Scan QR to start WhatsApp messaging

## Advantages:

- Directly can plant seeds in the grow bag. No extra cost for pots.
- The consistent and uniform distribution of coco peat properties
- Enables precise control over the growing media, simplifying the management of fertilizing & watering.
- Enhanced water retention with gradual release of water helps undisturbed plant growth. • High porosity & superior aeration promotes extensive root development.
